Stainable Primer™

Product Code:

AWP Stainable Primer™

Flow Coat Formulation

Viscosity: #3 Zhan Cup 12 to 15 Seconds

Flash Point: 140° f

Density (lb/gal): 10.5

Solids By weight: 65%

Solids by Volume: 50%

Shelf Life: 12 Months

Product Description: Stainable Primer™ is a ready to use waterborne primer.

Stainable Primer™ provides a high coverage hiding, high adhesion coat that leaves surfaces ready to stain and finish using most any varnish, polyurethane, or lacquer.

Uses: This product is designed to coat wood, thermo foil, MDF or most any hard surface. It accepts most any alkyd or waterborne stain and provides a look of a close grained wood. It can also be applied to inferior wood grade or mixed species to provide a surface to accept stain more evenly.

Environmental Data (as supplied) VOC lb/gal: <100**VOC g/l:** <30**Application Data:****Application Viscosity:** Zhan #3/ 11 to 15 seconds or paint brush.**Reducer:** Use water as required. This product requires very little water to lower the viscosity**Clean-up:** Use water in liquid state**Recommended Wet film:** 3-6 wet mils
