10 REASONS FOR CHOOSING CAMBRIA

1 LEADER IN DESIGN INNOVATION

Cambria continues to expand its design palette with innovative looks that respond to both changing trends and classic styles.

Cambria's Waterstone Collection captures all the movement and unpredictability of flowing water, in a range of both neutral and vibrant tones. It has unbelievable reflectivity, depth and is as pure as nature.

Cambria gives homeowners the eternal beauty of stone designs that once seemed impossible for quartz.

2 ALL DESIGNS, ONE PRICE

Cambria offers a palette of over 100 designs, the largest and most exceptional selection of quartz surfaces in the world. All designs and a wide array of edge profiles are offered at the same price!

3 FAMILY-OWNED, AMERICAN MADE

Cambria is the only family-owned, American made company in the quartz surfaces business.

4 SERIOUS ABOUT SERVICE

You won't find Cambria in the big box. At Cambria, we are loyal to the independent kitchen and bath retailer, resulting in a better overall purchasing experience for our customers. Our product is better than aisle numbers and automated check-out lines - Cambria stems from true American craftsmanship and high-touch service.

5 PREMIUM PERFORMANCE

Cambria is a natural stone surface that is elegant and practical. It is maintenance-free and never requires sealing, polishing or reconditioning. Simply wash with warm water; it's that easy.

6 QUARTZ, THE NATURAL CHOICE

Stronger than granite, quartz is one of the hardest and most abundant minerals found in nature. Cambria is 93% pure, natural quartz.

7 LIFETIME LIMITED WARRANTY

Cambria offers a Lifetime Limited Warranty against manufacturing defects.

8 A HEALTHY KITCHEN

Cambria is nonporous and nonabsorbent. You never have to worry about staining or the potential for bacterial growth. NSF 51 certified, Cambria is safe for use as a food preparation surface. Granite is porous and subject to absorption and staining if not maintained with sealers, conditioners and wax.

9 ENVIRONMENTAL BEST

At Cambria, managing and minimizing our impact on the environment in both our product offerings and daily operations is an important part of our business. In a nutshell, we want our product to have a big impact on our customers, not our environment.

Our product is primarily mined in North America, meaning we have lower transportation requirements than other quartz surfacing products produced outside the United States.

During processing, 100% of the water used in Cambria's plant and fabrication facilities is recycled through a series of advanced settling and filtering techniques. All diamond-metal tooling is retooled and re-used. Scrap material is collected and used as road base material on local construction projects.

10 EXCEEDING EXPECTATIONS

Cambria's reputation is built on a long standing commitment to service, exceptional craftsmanship and beauty. You can be confident you're choosing a company and a product that lives up to its performance promises.

Cambria is pure natural quartz. Variation in the natural stone (quartz) color, pattern, size, shape and shade are inherent and unique characteristics to be expected with this product. This does not affect the product performance in any manner. Color blotches are intended and designed into many colors to enhance the natural beauty. Samples are small select cuts from a slab; they do not exhibit all the characteristics of a design and therefore are not fully representative of what will be installed. Product will not be replaced due to these variations. Cambria is durable and more resistant to surface damage than other stone. However, all stone can be damaged by force and no stone is chip-proof. Objects hitting edges particularly at sinks or dishwashers may cause chips. Though a minor knife slip will dull the knife and not harm Cambria, no stone surface is scratch-proof. Surface markings are more visible on monotone colors than multi-colored surfaces. Cambria is not a seamless product, seams are visible. Where there are seams the product pattern and shade can change. Natural stone surfaces can be damaged by sudden and/or rapid change of temperature especially near the edges, as well as direct and/or sustained heating of the top. Cambria may not withstand the direct transfer of heat from pots and pans and other cooking units such as electric frying pans and griddles, and some crock-pots and roaster ovens and heat lamps. Therefore, the use of a hot pad or trivet is always recommended to prevent heating the product. Cambria is not a structural support material. 2cm and 3cm Cambria thicknesses are for countertops and must be supported. 1cm thicknesses are for surface finishes such as walls, tub and shower surrounds and fireplaces; horizontal applications such as a tub deck must be completely supported as well. Semi-polished finishes (1cm) will not shine and will soil and appear to stain from soiling. Rosslyn™, Minera™ and Parys™ designs are not available in 1cm thickness.

White Cliff™ is a unique, pure white design and shows markings caused during normal use.

Parys™, Rosslyn™ and Minera™ are unique members of Cambria's Jewel Collection™. These special quartz designs have aesthetics found only in nature that originate from minerals in the earth's crust. Our desire and the market demand for these looks compel us to offer them to you as they are - naturally dominated in free flowing quartz crystals.

1. Cambria is pure natural quartz. Variation in the natural stone (quartz) color, pattern, size, shape and shade are inherent and unique characteristics to be expected with this Product. This does not affect the Product performance in any manner.
2. Color blotches are intended and designed into many colors to enhance the natural beauty. Samples are small select cuts from a slab; they do not exhibit all the characteristics of a color and therefore are not fully representative of what will be installed. Product will not be replaced due to these variations.
3. Cambria is durable and more resistant to surface damage than other stone. However, all stone can be damaged by force and no stone is chip-proof. Objects hitting edges particularly at sinks or dishwashers may cause chips. Though a minor knife slip will dull the knife and not harm Cambria, no stone surface is scratch-proof. Surface markings are more visible on monotone colors than multi-colored surfaces.
4. Cambria is not a seamless Product, seams are visible. Where there are seams the Product pattern and shade can change.
5. Natural stone surfaces can be damaged by sudden and/or rapid change of temperature especially near the edges, as well as direct and/or sustained heating of the top.
