Product Description

This antenna has been designed for 700 MHz mobile radio systems typically used by public safety organizations like local police and fire departments. This center-fed collinear antenna provides consistent gain and impedance across the operating frequency band designed to meet various omnidirectional antenna requirements. Capable of handling 500 Watts of power, this antenna is suited to both receive and transmit applications.

Features/Benefits

-Triple-wrapped heavy duty fiberglsass construction assuers less tip deflection - much stronger than pultruded radomes used by competitors. Center-fed design eliminates beamswing across the band.
