

ICY WATERS LTD.

YUKON GOLD™ ARCTIC CHARR OVA

Developed by Icy Waters Ltd. over the past twenty years, Yukon Gold™ Ova is Icy Waters peerless proprietary strain of commercially available Arctic Char (*Salvelinus alpinus*).

Backed by years of research and continual monitoring, Yukon Gold™ Ova have been successfully grown on four continents. Each ovum represents countless hours spent to ensure the highest quality is available to our customers.

QUALITY • CONSISTENCY • SUSTAINABILITY • RELIABILITY

Yukon Gold™

HIGH HATCH-OUT RATES

Yukon Gold™ Arctic Charr Ova has very high survival rates. From shipping to receiving of the ova the survival rate is 95 - 100%. From receiving until the end of the first feeding the survival rate hovers around 90%. It can be expected that by the time the Char reach market size, the survival rate is approximately 80%.

LOW MATURATION & GOOD GROWTH

Yukon Gold™ Arctic Charr Ova are always triploid ova. This promotes very low maturation rates. The low maturation also ensures that the Char quickly grow more uniformly to market size. As well, due to the sterile nature of the Char, concerns of escapement and accidental introductions are considerably reduced.

DISEASE TOLERANCE

Yukon Gold™ Arctic Charr are inspected biannually and certified free of diseases under Schedule II of the Canadian Department of Fisheries and Oceans Fish Health Protection Regulations. As well, additional testing is done at private laboratories to ensure the fish health requirements of all countries of import are met. Yukon Gold™ Arctic Charr are scientifically documented to be resistant to BKD, VHS and ISA.

AVAILABILITY

Unlike other strains of Charr, Yukon Gold™ Arctic Charr is available for purchase biannually. Spring spawned ova are available for shipment in May/June and fall spawned ova become available in November/December.

CUSTOMER SERVICE

Icy Waters Ltd. is dedicated to providing customers with superior customer service. Support is available over the phone or by email free of charge. If needed an on-site consultation can be arranged for a fee. In the case of ova arriving in poor condition after shipping, reshipment is available.
