- ... high quality workmanship for perfect results
- ... installs in multiple patterns

Decking

Balconies/Roof Decks

Bathrooms

Install on flat surface

Align tabs

Snap together. After installation trim plastic tabs from exposed edges... Ready!

Thermo-Ash

Hardwood that has been dried without any chemicals at temperatures exceeding 400° F. Properties of wood are modified.

- optimized resistance to weather and decay
- extreme longevity
- increased dimensional stability

Thermo-Ash is a suitable construction material for conditions with variations in moisture and changes in climate.

A simple click-system for all solid surfaces, interior or exterior. At installation be sure surface is level and well drained.

Examples for application areas are:

Exterior decks, balconies, roof decks, bathrooms, saunas, etc.

Decking ages gracefully to silver-grey tones. To help maintain original color tones, apply a UV protectant deck oil.

Option 1. Offset pattern

Option 2. Straight pattern

Option 3. Mosaic patterns
