Product Description

These fiberglass enclosed antennas offer significant advantages over most exposed element arrays and deliver equal or better electrical performance. Commander Omni Antennas employ multiple, large diameter copper radiating elements stacked collinearly, fed in phase and enclosed in a weather-proof fiberglass housing. These DC grounded units use low loss Teflon and insulated connectors. The antenna provides 8.0 dBd gain and a full 10 MHz bandwidth. The antenna also provides 7.5 dBd omnidirectional gain and can withstand winds of 125 mph (200 km/hr). It is excellent for duplex systems with 8 MHz or less separation between Tx and Rx frequencies. Several mounting hardware options are available for these antennas.

1151 Series

Features/Benefits

Weatherproof design assures system reliability, withstands winds of 125 mph. Copper elements minimize possibility of intermod generation. DC grounded - protects against damage from lightning strikes.
