Hydro Excavation

Hydro excavation is a safe, non-destructive digging technology that eliminates the risk of damage to existing underground utilities. By using pressurized water and a powerful vacuum, sludge, slurry or any wetted material is removed through the suction hose and deposited into the 10 yard storage tank for removal or reuse.

Asphalt covering problem area cut open.

Water from broken 1" water main vacuumed into truck revealing break.

Hole discovered in sewer main caused by ruptured water main.
