HOW TO PUT HAIR IN A BUN

1. Wet hair.
2. Cover hair with a generous amount of hair gel. Comb hair and pull all of hair back, including any bangs, behind head in a ponytail just below the crown of the head.
3. Secure the pony tail with a rubber band.
4. Cover the ponytail with hair gel. Take the end of the ponytail and twist it with hands. The tighter you twist the hair the tighter the bun will be when finished.
5. As you twist the hair, it will curl up on itself, eventually forming the shape of the bun.
6. Tuck the tip of the ponytail under the coil of hair created. Secure the bun with several bobby pins.
7. Cover the bun with a hair net (this will hide the wispsiness and secure the bun). Overlap the hair net several times and then tuck in under hair. Secure with more bobby pins.
8. Spray the bun and all hair with hairspray to help secure the bun and prevent fly-aways.
