

## Fighting for America's Energy Future Facts About the Rover Pipeline in Ohio

### **An Opportunity for Millions in Wages in Ohio, Supporting at Least 4,500 Construction Careers and Providing Affordable Energy**

***The proposed Rover Pipeline will provide the first direct access for Michigan and northern Ohio to the nation's massive Marcellus Shale natural gas reserves, creating new economic opportunities for communities, workers and businesses in both states.***

#### ***Rover will benefit Ohio.***

- The 800-mile project would supply domestically produced natural gas to manufacturers, utilities and distributors for commercial and residential use in the Midwest, predominantly in Michigan and northern Ohio.
- The pipeline is expected to support about 10,000 construction careers, including 4,500 to 6,500 in Ohio.
- The economic impact for Ohio would be substantial. Pipeline construction is projected to provide \$109 million in sales taxes and about \$134 million annually in ad valorem taxes.
- The project will increase supplies of natural gas to Ohio residents, who are the eighth largest consumers of natural gas in the nation.

***Pipelines built by skilled, well-trained crafts workers are the safest way to deliver natural gas – 70 times safer than by truck, according to a recent Pro Publica special report.***

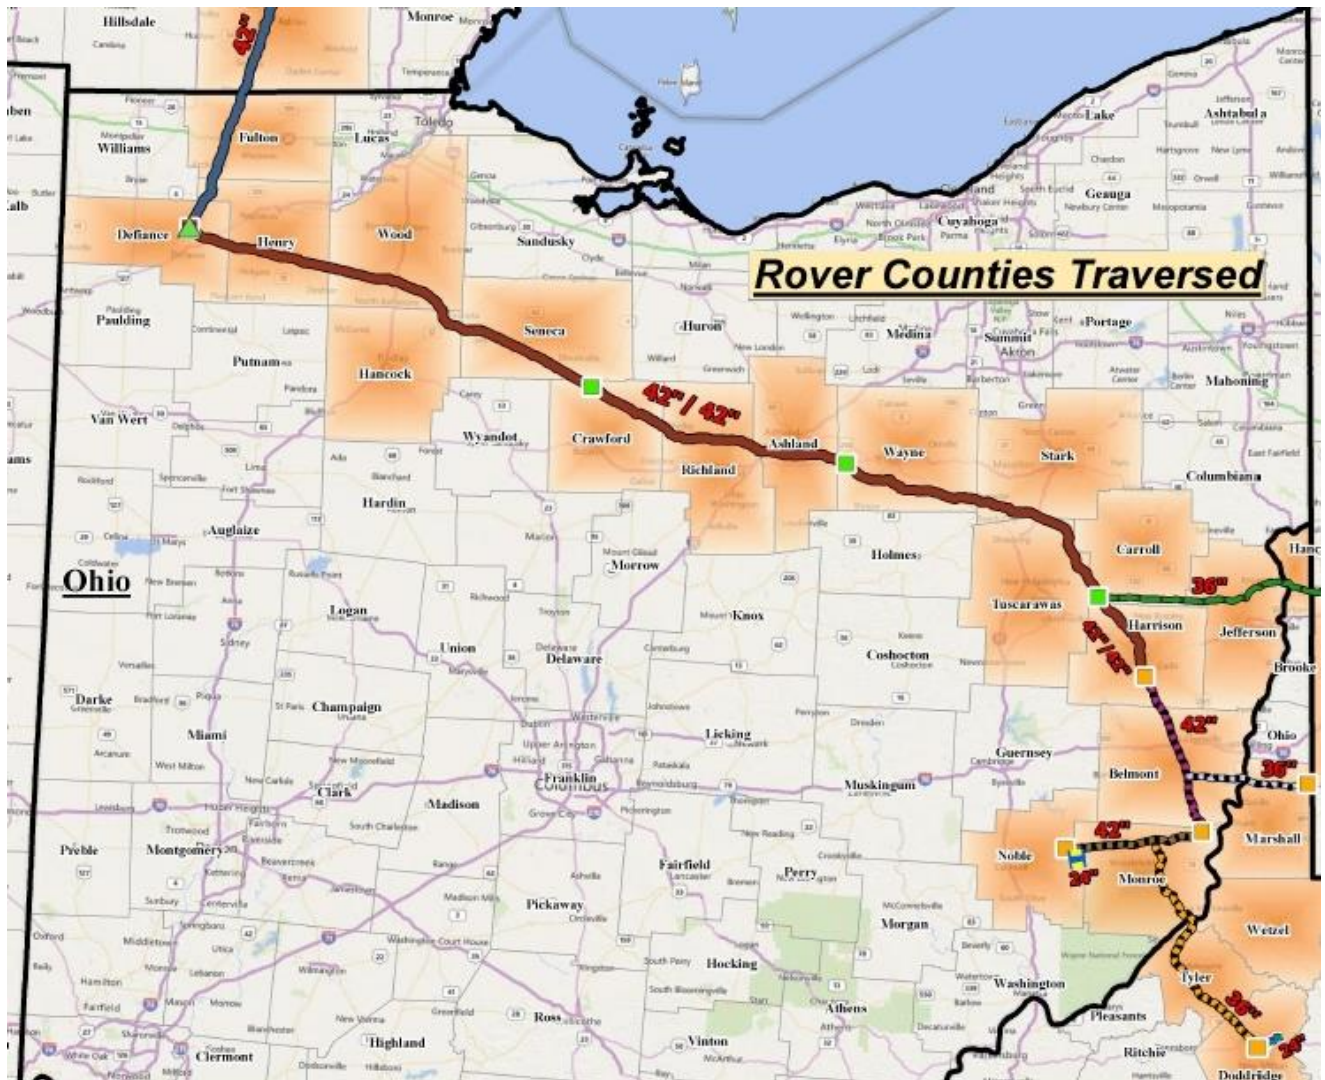

- The Ohio portion of the pipeline would be built by local LIUNA members, whose organization has more than a century of experience safely building pipelines in virtually every state and province of the U.S. and Canada.
- LIUNA invests about \$100 million a year in skills training for construction workers through more than 70 mobile and fixed training centers. Those centers offer 164 hours of pipeline-specific instruction.
- Upon completion, the pipeline will be state-of-the-art. It will be remotely monitored internally and externally 24 hours a day and will be equipped with automated shut-off valves.
