

Directions:

1. Measure opening width between brick moldings. (NOT BETWEEN JAMB!!)
2. Measure opening height from bottom of overhead brick molding to top of threshold.
3. Measure existing door-knob height from threshold.
4. Determine door swing. Standing outside looking in, if the hinge is on the left it is a left hinge, if it is on the right it is a right hinge.

Width: _____

Height: _____

Knob Height: _____

Door Swing: _____
