

Insurance

**We are VSP providers.**

**We also accept Anthem, Aetna, Tricare, and Medicare.**

Please be aware that your vision insurance may be through a different company than your medical insurance. For instance, some Anthem plans have Blue View or Davis Vision for eye care. And while we are Anthem providers, we are not Blue View or Davis providers. So it is very important that you know and understand your plan.

Visits for eye diseases, such as pink eye, are usually covered under your medical insurance.

*A word about insurance:* Insurance can be very confusing, even for us. We strive to help our patients navigate the confusing information that comes from the insurance company and use their benefits wisely. It is extremely helpful if you educate yourself about your insurance, including what company is administering the eye care plan and what is covered. Dilzer Eye Care participates only with those vision plans that allow us to provide you with the high quality of care you deserve.
